## How did we start

In 2023, we realized there weren't any groups or support for students looking for accommodation in Italy. So, we decided to start one, initially called Studenti Room.

Over time, this group gained over 300 active members and many homeowners. However, a large number of students began using the group for IMAT discussions. Therefore, we decided to create a WhatsApp group dedicated to IMAT discussions.

## How did we start

After the group began gaining popularity, we realized that we had the knowledge and experience to help students in their IMAT journey.

We started by providing free IMAT quizzes and establishing a community for IMAT aspiring students.

With over 500 members, we realized we could make a significant impact on students' lives. After receiving hundreds of 'thank you' messages for our work, we decided to take this seriously

## Our goals

Become the leading company with the largest amount of free resources, a vibrant pre-med community, and a comprehensive information centre.

Our initiatives include:

- Creating our own books for all sections of the IMAT and TOLC
- Publishing a 1000 Questions book for each section of the IMAT and TOLC
- Developing a free online course for IMAT and TOLC
- Providing guides on essential topics about Italy, such as public transport, accommodation, dos and don'ts, and much more.

## Aims of our company

We want to provide most of these resources free of charge to **students with low economic backgrounds**. However, to support this extensive amount of free content, we need to offer private courses. These courses are for students who **prefer** personalized guidance through the entire process, from preparing for the IMAT to moving to Italy and starting their new life.
